

# Hands-on Reproducible and Scalable Brain Imaging Analysis with Nipype

License: CC0 | Image credit: Arno Klein

1. [Plugins] Flexibility of execution without much change of code
2. [Dataflow] Multiple pipes rolled into one
3. [Interfaces] Access to many software with a uniform interface
4. [Function node] Ability to quickly plug in any code in a dataflow
5. [Workflow] No need to control filenames through a dataflow
6. [Semantics] Easily implement loops
7. [HPC] Adapts to many HPC cluster situations
